

Auryx SEO · GEO · AEO readiness

Audit of www.auryxlife.com source + live HTTP checks · September 11, 2026

Blocking finding
Production is a Vite SPA without SPA fallbacks. Direct requests to /shop, /learn, /blog, /our-method, product & blog deep links return Vercel 404. Crawlers and answer engines cannot index almost anything listed in the sitemap except the homepage.

SEO

34

/100 · crawlability broken

GEO

28

/100 · weak entity signals

AEO

36

/100 · content strong, unreachable

Crawlability critical

CSR-only meta

Schema/content mismatch

Strong Learn/Blog content patterns

Live URL status

Source: HEAD/GET against production · Sep 11, 2026

URL	Status	Implication
https://www.auryxlife.com/	200	Homepage HTML + meta present
https://www.auryxlife.com/shop	404	Sitemap priority 0.9 — dead to crawlers
https://www.auryxlife.com/learn	404	Education hub + FAQ schema unreachable
https://www.auryxlife.com/blog/...	404	All 5 journal URLs 404 on direct fetch
https://www.auryxlife.com/shop/semaglutide	404	Product URLs in sitemap return NOT_FOUND
https://www.auryxlife.com/robots.txt	200	Allow + sitemap declared
https://www.auryxlife.com/sitemap.xml	200	28 locs; many now 404
https://www.auryxlife.com/llms.txt	404	No AI citation / answer-engine file
https://www.auryxlife.com/opengraph.jpg	200	OG image resolves

Findings by priority

Pri	Lens	Issue	Detail
P0	SEO	SPA routes 404 in production	No rewrite to index.html. Live checks: /shop, /learn, /blog, product & blog URLs return NOT_FOUND. Only / works. Sitemap points crawlers at dead URLs.
P0	SEO	Client-only meta / no prerender	Vite CSR SPA. Blog/Learn inject title, canonical, OG, JSON-LD in useEffect. Non-JS crawlers still see homepage shell on deep URLs.
P0	AEO	Homepage FAQPage schema has no FAQ UI	index.html ships FAQPage JSON-LD but home has no matching FAQ section. Orphaned FAQ markup risks rich-result rejection.

Pri	Lens	Issue	Detail
P1	GEO	Generic US geo tags, incomplete MedicalBusiness	Centroid US coordinates. Schema lacks logo, image, telephone, PostalAddress, sameAs, founder name. Weak entity resolution.
P1	AEO	Conflicting medical vs research claims	Head/schema: MD-led telemedicine clinic. Footer/Learn: RESEARCH USE ONLY. Answer engines may refuse to cite conflicting claims.
P1	SEO	Sitemap incomplete vs catalog	15 product URLs in sitemap; shop has ~32 slugs. Many compounds missing. lastmod mostly 2026-05-15.
P1	SEO	Product pages lack Product/Offer schema	Only title + description set. No Product, Offer, BreadcrumbList, or OG image per SKU.
P2	AEO	No llms.txt / AI crawl hints	No brand summary / citation policy file for ChatGPT/Perplexity-style crawlers.
P2	SEO	Age gate + API-hydrated shop	Age overlay until localStorage; product copy loads via API. First paint can look empty to bots.
P2	SEO	Meta gaps & brand inconsistency	Missing og:site_name, og:locale, twitter:site. Titles mix Auryx / AURYX. Checkout not noindexed (latent once routing fixed).

What is already working

- Homepage baseline: title, description, robots, canonical, OG/Twitter, MedicalBusiness + FAQ JSON-LD
- Learn page: MedicalWebPage + FAQPage, physician author/reviewedBy, strong educational copy
- Blog posts: unique metaDescription, Article JSON-LD, faqAnswer on H2s, named MD author
- robots.txt allows crawl and points to sitemap; admin disallowed
- OG image 1200×630 present and live

Score drivers

SEO 34 — Meta/schema on / are decent, but routing + CSR wipe gains on all money pages.

GEO 28 — Nationwide intent without a strong Organization entity; centroid geo tags add little.

AEO 36 — Physician-authored Q&A content is citation-ready, but pages 404 and claims conflict.

Fix order

#	Action	Why
1	Add Vercel SPA rewrite: all non-file routes → /index.html	Unblocks every sitemap URL
2	Prerender or SSR key routes (/ , /shop, /learn, /blog, posts, top products)	Real HTML for Google + AI crawlers
3	Align claims: one consistent medical vs research positioning	Trust + citable answers
4	Render homepage FAQ UI matching JSON-LD, or move FAQ schema only to /learn	Valid rich results
5	Complete MedicalBusiness/Organization: logo, sameAs, contact, areaServed	GEO entity strength
6	Regenerate sitemap from live inventory; noindex checkout/success/admin	Clean crawl budget
7	Add Product + Offer + BreadcrumbList on PDP; sync OG/canonical	Shopping + AEO
8	Publish /llms.txt with brand summary and key URLs	AEO/GEO discoverability

Verdict

Do not invest in more content SEO until SPA rewrites (and ideally prerender) ship. Until then, Google and AI answer engines effectively only see the homepage — while the sitemap advertises 27 other URLs that currently 404.
